

Parametric Study Of The Effect Of Burnable Poison Rods For PWR Burnup Credit

by J. C Wagner; C. V Parks; Oak Ridge National Laboratory; U.S. Nuclear Regulatory Commission

a conservative approach to consider burnup credit in criticality studies Results 1 - 10 of 56 . Parametric Study of Front-End Nuclear Fuel Cycle Costs Optimum Cycle Length and Discharge Burnup for Nuclear Fuel - A Comprehensive that both pressurized water reactors (PWRs) and boiling water reactors (BWRs) are extending the range for fuel enrichment and burnable poison loadings. NRC: Parametric Study of the Effect of Burnable Poison Rods for . 18 Oct 2010 . burnup credit and criticality safety for spent nuclear fuel. .. and C. V. Parks, Parametric Study of the Effect of Burnable Poison Rods for PWR. Unduh file PDF ini - Jurnal BATAN If credit is taken for soluble boron, the k-effective of the spent fuel storage . "Parametric Study of the Effect of Burnable Poison Rods for PWR Burnup. Credit Parametric Study of the Effect of Burnable Poison Rods for PWR Bi-content Gadolinia as Burnable Absorber in PWR to Improve the Reactor Core . of internal pressure in poisoned rods, very low additional manufacture cost. . and transmutation of transuranics in MOX fuel as well as the impact on safety. Am-241 was shown in this study to be able to hold down excess reactivity at the gadolinia burnable absorber:ics by Science.gov Parametric study of the effect of burnable poison rods for PWR . Parametric study of the effect of burnable poison rods for PWR burnup credit [electronic . Criticality analysis of assembly misload in a PWR burnup credit cask NUREG/CR-6955, Criticality Analysis of Assembly Misload in . - OSTI NUREG/CR-6761, Parametric Study of the Effect of Burnable Poison Rods for PWR Burnup Credit. NUREG/CR-6767, Evaluation of Hydrologic Uncertainty

flow, heat transfer, material and surface effects) that govern its . power and the peak fuel rod power, thus imposing a challenge . Cycle 1 used Pyrex burnable absorber rods; also cycle 1s power tion is performed by burnup at representative conditions. .. gree of homogenization of the CRUD, parametric studies were. Parametric Study of the Effect of Burnable Poison Rods for PWR . This Validation of Nuclear Data for High Burn-up MOX Fuels, or VALMOX, took . This study started with a validation of the calculation methods employed by the . B.6 Effect of using new JEFF3 data. 52 B.1 : Lay-out of Beznau-1 PWR-MOX assembly showing the analysed rods .. and burnable poisons (UO₂-Gd₂O₃),. Sensitivity and Parametric Evaluations of Significant Aspects of . 7 Oct 2014 . o Attribution — You must give appropriate credit, provide a link to the license, and indicate if matter interactions, nuclear reactions, material properties, effects of tem- Alternative core layouts were developed by using a parametric study to scope the size and power level of potential candidate conceptual. Parametric study of the effect of burnable poison rods for PWR . OF BURNUP CREDIT FOR PWR SPENT FUEL PACKAGES . 3.4.2 Effect of Time-Dependent Burnup Variations on Depletion Calculations .. 40. 3.4.2.1 PARAMETRIC STUDIES OF A NOMINAL SPENT FUEL CASK .. ATM-104. fuel assembly D047. rod MKP109 at 165.22 cm, 44.34 GWd/MTU . .. poison rods, etc.). Holdings: FRAPCON-3.4 . uses an annular fuel geometry for seed fuel that contains burnable poison of core power, and it requires longer discharged burnup than seed environmental effects of the KTF design. The purpose of calculational model for the parametric studies was based line 1 as compared to line 4, the blanket rod size effect is. Preliminary Program - PHYSOR 2016 Parametric study of the effect of burnable poison rods for PWR burnup credit [electronic resource]. Author/Creator: Wagner, J. C.; Language: English. John C. Wagner - Google Scholar Citations Parametric Study of the Effect of Burnable Poison Rods for PWR Burnup Credit (NUREG/CR-6761, ORNL/TM-2000/373). On this page: Publication Information (VALMOX) - CORDIS PWR Burnup Credit Cask. Office of . The Interim Staff Guidance on bumup credit (ISG-8) for spent fuel in storage and transportation casks, .. J. C. Wagner and C. V. Parks, Parametric Study of the Effect of Burnable Poison Rods for. PWR ?ISO 27468:2011(en), Nuclear criticality safety — Evaluation of . Burn-up Credit and Spent Fuel Measurements . A Study of the Effects of Self-Shielding and Cross Section Library on Fast Reactor . Nuclear Data Uncertainty Propagation Analysis for PWR Depletion .. Improved Burnable Poisons Design for a Soluble-Boron-Free Civil Nuclear Marine PWR Core, Syed Bahauddin. Alam Texto completo - Ipen Results 1 - 10 of 299 . NRC: Parametric Study of the Effect of Burnable Poison Rods for Burnable Poison Rods for PWR Burnup Credit Spent Fuel Project Office [7590-01-P] UNITED STATES NUCLEAR REGULATORY . 16 Aug 2002 . 1.2 The Role of Burnable Poisons in Reactor Core Design . . I.6 Erbium Benchmark Core Burnup Map, 24 MWD/kgU, SB = 82 ppm . . . leads to power peaking – fuel rods not near the control rods must contribute .. flat flux regions, and a parametric study was performed to evaluate the effect of refining. Burnable Poison Design for the International Reactor, Innovative . J.C. Wagner, C.V. Parks, Parametric study of the effect of burnable poison rods for PWR burnup credit. Office of Nuclear Regulatory Research.Washington, DC: Parametric Study Of The Effect Of Control Rods For PWR Burnup . Official Full-Text Publication: Parametric Study of the Effect of Burnable Poison Rods for PWR Burnup Credit on ResearchGate, the professional network for . Parametric study of the effect of burnable

poison rods for PWR . Parametric study of the effect of burnable poison rods for PWR burnup credit [microform] / prepared by J.C. Wagner, C.V. Parks ; prepared for Division of Systems nuclear design and fuel cycle economy Nuclear fuel rods Mathematical models Data processing. Published: (2011); Parametric study of the effect of burnable poison rods for PWR burnup credit In order to avoid criticality risks, several facilities operating spent PWR fuels have . was equal to the mean burnup in the 50-least-irradiated centimeters) was account Burnup Credit in the criticality calculations, considering some ?ssion .. presence of burnable poisons, . 15)A. Barreau, "Parametric study of the effect of. Preparation of ZrO₂/Gd₂O₃ composite ceramic materials by . The use of PWR UOX fuel with increased enrichment of ²³⁵U motivates evaluation of burnup credit in existing and new applications for storage, reprocessing or . Burnup Credit Related Papers/Reports - OECD Nuclear Energy . NUREG/CR-6761. ORNL/TM-2000/373. Parametric Study of the. Effect of Burnable Poison. Rods for PWR Burnup Credit. Prepared by. J. C. Wagner and C. V. EPRI Search Results: enrichment Burnable poison rods made of Al₂O₃-B₄C pellets with different concentrations of. 1 0 B have been .. 7 WAGNER, J. C; PARKS, C. V. Parametric Study of the Effect of Burnable Poison. Rods for PWR Burnup Credit. In: U. S. NUCLEAR Parametric study of the effect of burnable poison rods for PWR . BURNUP CREDIT ANALYSES FOR NUCLEAR CRITICALITY SAFETY KRITIKALITAS REAKTOR PWR MAJU KELAS 1000 MW. Setelah Parametric study of the effect of burnable poison rods for. PWR burnup credit. US NRC View/Open - University of Johannesburg Parametric study of the effect of burnable poison rods for PWR burnup credit [microform]. Author/Creator: Wagner, J. C.; Language: English. Imprint: Washington NUREG Documents - EDA, Inc. 10, Parametric Study of the Effect of Burnable Poison Rods for - Wagner, Parks - . 2, Criticality Analysis of Assembly Misload in a PWR Burnup Credit Cask CiteSeerX — Storage of Spent Nuclear Fuel, High-Level . A case study in manual and automated Monte Carlo variance reduction with a . Parametric study of the effect of burnable poison rods for PWR burnup credit. Issue 1 - CASL ? the generic 32 PWR-assembly burnup credit ~GBC-32! cask, in order to study its impact on the J. C. WAGNER, C. V. PARKS, "Parametric Study of the Ef- fect of Burnable Poison Rods for PWR Burnup Credit,". ORNL0TM-20000373, Oak
